

Cargo port STY

Ore mining and loading in STY

Cargo port STY

STY transport system allows delivery of cargo to the sea within the territorial waters without large expenses (12 miles from shore) and ensures the delivery of ore to the STY port, located in the area of natural depth — 20 m and more

Loading on bulk carriers, combined with the unloading STY terminal at the port

Cargo port STY

Handling of ore in two bulk carriers at the same time

Cargo port STY

Unloading ore from a bulk carrier on the route STY

Cargo port STY

STY port and STY transportation system form a functional complex with the automated transportation of iron ore from ore warehouse to bulk carrier as a single logistics process

General view with the STY transport system
